

Education

University of engineering and technology (UET) – Hanoi
National University

Major: Information technology, Degree: Bachelor

English for communication (Apollo)

Degree: Advanced

Business / Professional Experience

2020-2021: DevOps CI/CD

2019-2020 Software developer

Industry Know-how

- Database development
- Linux, Centos system
- Cloud computing
- Mobile development

Main focus / (key) technical skills

- Main focus: DevOps, application development
- CI/CD Tools: Jenkins
- Containerization: Docker, Kubernetes, Vagrant
- Web Server, Proxy & Load balancing: Nginx, Tomcat
- Database: MariaDB, MySQL
- Orchestration & Configuration management tools: Ansible, Terraform
- Cloud Computing: AWS, GCP
- Virtualization: VirtualBox, VMWare
- Script language: Bash Shell
- Software Dev
- Monitoring & Logging Centralized: EFK, ELK
- Methodologies: Agile

Projects & Assignments (extract)

- IFI Solution: Design and implement CI/CD pipeline for java spring application using Jenkins and GitHub for CI, CD using Nginx, Ansible, AWS, Docker. Apply K8s for health check.
- IFI Solution: Design Mysql database for spring application and frond-end using jsp, testing use cucumber. Create fully automation with CI/CD pipeline. Containerizing .war file in docker image.
- IFI Solution: information security and ethic in software development
- Dev/Ops, Managing Infra for some software projects with Professors at University of engineering and technology
